THE IMPERIAL PATENT OFFICE IN BERLIN ISSUED AT JULY 8, 1908 THE INVENTION OF THE COFFEE FILTER, BY THE DRESDEN HOUSEWIFE AMALIE AUGUSTE MELITTA BENTZ (NÉE LIEBSCHER) IN THE REGISTERED PATENT GAZETTE.

*Original register sheet of the Imperial Patent Office in Berlin from July 8th 1908.

COFFEE FILTER & Aroma

The Aroma Filters refine the coffee enjoyment, in the common brewing method, through the addition of flavors introduced directly into the hot filter paper.

That way we rise up our customers experiences to totally new taste dimensions.

Filter coffee in general is the most ecologically sustainable kind of coffee making. The Aroma Filters are compostable organic waste.

45% of coffee drinkers globally use filter coffee

25% of the products in the segments Capsules, Pads, Instand and Out-of-Home are flavored

A cup of Aroma Filter coffee is the most economical in comparison

 Aroma Filter Chocolate
 Content 16 Aroma Filter

Item Number: 709500
 Aroma Filter Vanilla
 Content 16 Aroma Filter

Item Number: 709517
 Aroma Filter Caramel
 Content 16 Aroma Filter

Packaging Unit:
 Wrapping paper 111g/m²
 Content: 16 Aroma Filter
Pack size:
 20 items/Tray sorted

 many more flavours to come

13 cm wide

Founding Legend

In the turmoil of the upcoming century our founder Johann was already working in several jobs until he finally found his calling as an entrepreneur.

In search of meaning, drifting, like so many at the beginning of the nascent twenties. The grandson of a goose farmer were invited one day to pitch his innovative ideas at a large stage of the University of Munich.

The day before the event, and after viewing the guest list, he felt his first idea was no longer sufficient and he went for a walk to philosophize.

The next morning he simply presented his new idea, the Aroma Filters, and met enthusiasm.

Already one year later, he held a patent for the aromatization of hot filter paper in his hands and thus laid the foundation stone for the future corporation.
